

Daniil Olekh

Web Developer — Astro, Headless CMS, Core Web Vitals

Vienna, Austria · remote, EU time zone · danolekh.com · github.com/danolekh

Web developer who builds fast content and marketing sites on Astro, Next.js and headless CMSs (Strapi), and fixes slow ones. Last rescue: mobile PageSpeed 69 to 99 and load time from 16 seconds to under 2, verified in the client's 5.0 review. Multi-locale routing, SEO, pixel-precise Figma implementation, deployments on Vercel and Cloudflare, everything handed over under the client's own accounts.

EXPERIENCE

Freelance (Upwork) · Full-Stack Developer Jan 2026 – Aug 2026 · Remote

- Rebuilt an agriturismo website on Astro, Tailwind and Strapi (IT/EN i18n, role-based CMS access, Vercel + Railway): mobile PageSpeed 69 → 99, load time ~16 s → under 2 s, 5.0 client review. Case study: danolekh.com/p/oasi-kadir
- Reverse-engineered the parallax carousel, card carousel and menu animation from the old site's minified WordPress bundle (no source available) and reimplemented them 1:1.
- Found and fixed hosting-compliance and DNS issues during the migration unprompted; full handover docs with everything under the client's own accounts.

Renewator · Software Engineer (contract) Aug 2026 – present · Remote

- Built event-driven Node.js microservices for a live iGaming platform (identity, gateway, wallet, bonus, casino, notification): Express, Drizzle ORM, PostgreSQL, Redis, Docker, GitLab CI.
- Astro marketing site for a logistics operator: 14 routes in three locales (uk/en/pl), pixel-matched against Figma with measured diffs, static build served by nginx.

Freelance · Full-Stack Developer May 2024 – Dec 2024 · Remote

- Delivered a full e-commerce platform from scratch on Next.js 14 + Drizzle ORM: custom admin panel for 2,000+ products, dynamic filtering, role-based auth.
- 90+ Real Experience Score and steady organic SEO traffic (meta, Open Graph, JSON-LD).

Quextro · Founding Engineer Dec 2024 – Dec 2025 · Remote

- Built the entire ed-tech platform solo: Bun + Effect.ts + Drizzle ORM on the back, React 19 + TanStack Router on the front. Used today by British teachers and students.
- Designed the core LLM pipeline that extracts questions and topics from PDF exam papers, with Zod-validated output and retries when the model returns something wrong.

Radency · Software Engineer 2023 – 2024 · Kyiv / remote

- Optimized a multi-tenant system (React, Express, Firebase) serving 10,000+ active users.
- Built internal Vue/NestJS tools and Chrome extensions used daily by the HR department.

PROJECTS

Azulejo (azulejo.danolekh.com): Ceramics storefront on TanStack Start + React 19, Drizzle + PostgreSQL, deployed on Cloudflare Workers (Hyperdrive), R2 media pipeline with sharp and blurhash, Strapi-backed journal, Vitest.

OPEN SOURCE

- **opentui**, the terminal-UI library opencode is built on. Merged PR #558: browser-like text selection in textareas and a viewport-change selection bug fix.
- **code-racer**, top contributor in 2023 (WebDevCody): multiplayer race rooms feature plus several fixes.

SKILLS

Frontend	React 19, Next.js (App Router), TanStack Start / Router / Query, Astro, Tailwind CSS, Zustand, Radix / Base UI, Vite
Other	Strapi, Core Web Vitals / performance, SEO, i18n, LLM integration, Vitest, Claude Code daily (1+ yr)
Languages	TypeScript, JavaScript, Python, SQL
Infra	Docker, GitHub Actions, GitLab CI, Vercel, Cloudflare Workers, AWS, Railway, OpenTelemetry
Backend	Node.js, Bun, Express, Hono, Effect.ts, REST APIs, webhooks, Zod, event-driven services
Data	PostgreSQL, Drizzle ORM, Redis, SQLite, S3 / R2

EDUCATION

BSc Computer Science, Taras Shevchenko National
University of Kyiv (2022 – 2026)

LANGUAGES

Ukrainian (native), Russian (fluent), English (B2), German
(beginner)
