

Daniil Olekh

Frontend Engineer (React / TypeScript)

Vienna, Austria · remote, EU time zone · danolekh.com · github.com/danolekh

Frontend-leaning full-stack developer, about three years commercial, React and TypeScript most of the day. React 19, Next.js App Router, TanStack Router and Query, SSR and hydration, Astro for content sites, Tailwind, pixel-precise Figma work. I also build the API behind the UI when needed (Node, Postgres). Best-known result: a site rebuild that took mobile PageSpeed from 69 to 99.

EXPERIENCE

Renewator · Software Engineer (contract) Aug 2026 – present · Remote

- Built event-driven Node.js microservices for a live iGaming platform (identity, gateway, wallet, bonus, casino, notification): Express, Drizzle ORM, PostgreSQL, Redis, Docker, GitLab CI.
- Shipped per-brand GEO access rules end to end: schema, the shared decision function, gateway counters, monitoring alerts on threshold crossings, admin CRUD and the React admin UI.
- Astro marketing site for a logistics operator: 14 routes in three locales (uk/en/pl), pixel-matched against Figma with measured diffs, static build served by nginx.

Freelance (Upwork) · Full-Stack Developer Jan 2026 – Aug 2026 · Remote

- Rebuilt an agriturismo website on Astro, Tailwind and Strapi (IT/EN i18n, role-based CMS access, Vercel + Railway): mobile PageSpeed 69 → 99, load time ~16 s → under 2 s, 5.0 client review. Case study: danolekh.com/p/oasi-kadir
- Reverse-engineered the parallax carousel, card carousel and menu animation from the old site's minified WordPress bundle (no source available) and reimplemented them 1:1.

Quextro · Founding Engineer Dec 2024 – Dec 2025 · Remote

- Built the entire ed-tech platform solo: Bun + Effect.ts + Drizzle ORM on the back, React 19 + TanStack Router on the front. Used today by British teachers and students.
- Designed the core LLM pipeline that extracts questions and topics from PDF exam papers, with Zod-validated output and retries when the model returns something wrong.
- Owned the React app end to end: TanStack Query cache design, optimistic updates, SSR and hydration, accessible UI.

Freelance · Full-Stack Developer May 2024 – Dec 2024 · Remote

- Delivered a full e-commerce platform from scratch on Next.js 14 + Drizzle ORM: custom admin panel for 2,000+ products, dynamic filtering, role-based auth.
- 90+ Real Experience Score and steady organic SEO traffic (meta, Open Graph, JSON-LD).

Radency · Software Engineer 2023 – 2024 · Kyiv / remote

- Optimized a multi-tenant system (React, Express, Firebase) serving 10,000+ active users.
- Built internal Vue/NestJS tools and Chrome extensions used daily by the HR department.

PROJECTS

Azulejo (azulejo.danolekh.com): Ceramics storefront on TanStack Start + React 19, Drizzle + PostgreSQL, deployed on Cloudflare Workers (Hyperdrive), R2 media pipeline with sharp and blurbhash, Strapi-backed journal, Vitest.

OPEN SOURCE

- opentui**, the terminal-UI library opencode is built on. Merged PR #558: browser-like text selection in textareas and a viewport-change selection bug fix.
- code-racer**, top contributor in 2023 (WebDevCody): multiplayer race rooms feature plus several fixes.

SKILLS

Frontend	React 19, Next.js (App Router), TanStack Start / Router / Query, Astro, Tailwind CSS, Zustand, Radix / Base UI, Vite
Languages	TypeScript, JavaScript, Python, SQL
Backend	Node.js, Bun, Express, Hono, Effect.ts, REST APIs, webhooks, Zod, event-driven services
Data	PostgreSQL, Drizzle ORM, Redis, SQLite, S3 / R2
Infra	Docker, GitHub Actions, GitLab CI, Vercel, Cloudflare Workers, AWS, Railway, OpenTelemetry

Other

Strapi, Core Web Vitals / performance, SEO, i18n, LLM integration, Vitest, Claude Code daily (1+ yr)

EDUCATION

BSc Computer Science, Taras Shevchenko National
University of Kyiv (2022 – 2026)

LANGUAGES

Ukrainian (native), Russian (fluent), English (B2), German
(beginner)
