

# Daniil Olekh

## Backend / Node.js Engineer (TypeScript)

Vienna, Austria · remote, EU time zone · [danyaolekhq@gmail.com](mailto:danyaolekhq@gmail.com) · [danolekh.com](https://danolekh.com) · [github.com/danolekh](https://github.com/danolekh) · [linkedin.com/in/danolekh](https://linkedin.com/in/danolekh) · Telegram @danolekh

Backend-leaning TypeScript engineer, about three years commercial. Node and Bun services on PostgreSQL with Drizzle, Redis, event-driven flows between services, idempotency and rate limiting where money or auth is involved, Docker and CI around it. Currently shipping wallet, bonus and identity services for a live iGaming platform; previously built an ed-tech backend solo in Effect.ts with an LLM extraction pipeline.

### EXPERIENCE

**Renewator** · Software Engineer (contract) Aug 2026 – present · Remote

- Build event-driven Node.js microservices for a live iGaming platform (identity, gateway, wallet, bonus, casino, notification): Express, Drizzle ORM, PostgreSQL, Redis, Docker, GitLab CI.
- Shipped per-brand GEO access rules end to end: schema, the shared decision function, gateway counters, monitoring alerts on threshold crossings, admin CRUD and the React admin UI.
- Money-correctness work: idempotent withdrawals keyed on the ledger index, single-statement bonus expiry with debit, abuse limits on bonus issuance, campaign dry-run calculation with per-user exclusion reasons.
- Auth hardening: strict rate limits on the login/register aliases, session-revocation events on password change and reset, consumed by the gateway.

**Quextro** · Founding Engineer Dec 2024 – Dec 2025 · Remote

- Built the entire ed-tech platform solo: Bun + Effect.ts + Drizzle ORM on the back, React 19 + TanStack Router on the front. Used today by British teachers and students.
- Designed the core LLM pipeline that extracts questions and topics from PDF exam papers, with Zod-validated output and retries when the model returns something wrong.
- Owned CI/CD, Docker containerization and OpenTelemetry observability on AWS and Railway.

**Radency** · Software Engineer 2023 – 2024 · Kyiv / remote

- Optimized a multi-tenant system (React, Express, Firebase) serving 10,000+ active users.
- Built internal Vue/NestJS tools and Chrome extensions used daily by the HR department.

**Freelance** · Full-Stack Developer May 2024 – Dec 2024 · Remote

- Delivered a full e-commerce platform from scratch on Next.js 14 + Drizzle ORM: custom admin panel for 2,000+ products, dynamic filtering, role-based auth.

**Freelance (Upwork)** · Full-Stack Developer Jan 2026 – Aug 2026 · Remote

- Rebuilt an agriturismo website on Astro, Tailwind and Strapi (IT/EN i18n, role-based CMS access, Vercel + Railway): mobile PageSpeed 69 → 99, load time ~16 s → under 2 s, 5.0 client review. Case study: [danolekh.com/p/oasi-kadir](https://danolekh.com/p/oasi-kadir)
- Found and fixed hosting-compliance and DNS issues during the migration unprompted; full handover docs with everything under the client's own accounts.

### PROJECTS

**Azulejo** ([azulejo.danolekh.com](https://azulejo.danolekh.com)): Ceramics storefront on TanStack Start + React 19, Drizzle + PostgreSQL, deployed on Cloudflare Workers (Hyperdrive), R2 media pipeline with sharp and blurhash, Strapi-backed journal, Vitest.

### OPEN SOURCE

- **opentui**, the terminal-UI library opencode is built on. Merged PR #558: browser-like text selection in textareas and a viewport-change selection bug fix.
- **code-racer**, top contributor in 2023 (WebDevCody): multiplayer race rooms feature plus several fixes.

### SKILLS

|           |                                                                                            |
|-----------|--------------------------------------------------------------------------------------------|
| Backend   | Node.js, Bun, Express, Hono, Effect.ts, REST APIs, webhooks, Zod, event-driven services    |
| Data      | PostgreSQL, Drizzle ORM, Redis, SQLite, S3 / R2                                            |
| Languages | TypeScript, JavaScript, Python, SQL                                                        |
| Infra     | Docker, GitHub Actions, GitLab CI, Vercel, Cloudflare Workers, AWS, Railway, OpenTelemetry |

|          |                                                                                                                      |
|----------|----------------------------------------------------------------------------------------------------------------------|
| Frontend | React 19, Next.js (App Router), TanStack Start / Router / Query, Astro, Tailwind CSS, Zustand, Radix / Base UI, Vite |
| Other    | Strapi, Core Web Vitals / performance, SEO, i18n, LLM integration, Vitest, Claude Code daily (1+ yr)                 |

**EDUCATION**

BSc Computer Science, Taras Shevchenko National University of Kyiv (2022 – 2026)

**LANGUAGES**

Ukrainian (native), Russian (fluent), English (B2), German (beginner)
